

Pro II Speed Sensor

Powerful, Feature-Loaded Sports Speed Measurement Radar

The Pro II Speed Sensor is a complete and highly-accurate Doppler Radar in a small, rugged waterproof housing that can measure the speed of a wide variety of objects including baseballs, vehicles, tennis balls, and hockey pucks. It combines features and performance of the Stalker Pro II handheld sport gun with the Sport Speed Sensor configuration. The unit is available in an RS-232 model and an RS-485 model and includes complete software support.

- Same performance as the Major League favorite Stalker Pro II Hand held

- Waterproof design

- PC application available for configuration and communication with the radar.

- Reports speeds in MPH, km/s, knots, feet/second, and meters/second in whole units or tenths resolution.

- Measures speeds up to 1430 KPH.

- Directional - tracks objects moving in either direction.

- Reports Live (Rolldown), Peak, and Highest Peak speeds in one direction; Hit speeds in opposite direction.

- Detects baseballs to 152 metres and average-sized automobiles to 2.8 kilometres

- Wide range of High and Low Speed Thresholds to focus on speed range of interest.

- Tracks everything from car-sized objects (and larger) to BBs.

- Automatic cosine angle adjustment compensates for both off-horizontal and off-vertical angle readings

- Waterproof; Ka-Band, 34.6 GHz; 15mW nominal power output; $\pm 3\%$ accuracy.

- Connect multiple radars in point-to-multipoint configuration.

- A, A1, b, bE, and S streaming data protocols.

APPLICATIONS:

- Scoreboards
- Baseball Stadiums
- Tennis Facilities
- Auto Racing
- Carnival and Amusement Parks
